Our client is both a mobile app and a community that allows peoplein cities across Europe to instantly find a ride with friendly neighbors driving their own cars. We are pioneers of the sharing economy and have built start-ups such as Airbnb and Foursquare in Europe before.

Headquartered in Hamburg, Germany, our ambition is to create a more affordable and more human transportation alternative in cities across Europe. WunderCar is backed by leading investors from Germany, France and the UK.

We are looking for someone who has a strong experience developing mobile backend services and is passionate about his work.

Your tasks:

Design core, backend software components

Build the core of WunderCar

Work closely with our product and mobile teams

Work closely with operations and infrastructure to build and scale back-end services

Your Profile:

Excellent coding skills in Ruby

B.S. or M.S. Computer Science or 3+ years in relevant work experience

3+ years of object-oriented software development experience

Experience of the full web technology stack and proficiency creating applications in Rails or Sinatra

Confidence working with and developing RESTful APIs

Tremendous attention to detail and an ability to build reliable, scalable, and flexible software

Core web technologies: HTML, CSS, and JavaScript

A scrappy, get it done attitude that completes high quality projects and tackles unforeseen challenges

Work and play well with others; WunderCar is a collaborative environment

Bonus Points if you have ...

Github profile or link to open source work

Experience in Test Driven Development (TDD)

Experience in Agile Methodologies

What we offer:

Competitive Compensation

Stock Options

Hack Nights

Happy Hours

Ping-Pong

Free Snacks

Video Games
